Seattle Building Maintenance, Inc.

Seattle Building Maintenance was founded in 2000 to fill a need in the Seattle market to better serve property managers and building owners. After significant research, they found that property managers and building owners were not getting the commercial janitorial services their tenants deserved. Feedback showed that property managers were lacking the consistent, high quality, affordable, and reliable commercial janitorial service for their tenants, and the building owners they represent.

So that's exactly what they set out to solve for their clients...

As the new and innovative cleaning team in town, SBM was prepared to look at the problem a little differently. They were determined that no company in the Greater Seattle area could match their entrepreneurial drive to be better or their relentless quest for quality. And that's precisely what they did.
